PROFESSIONAL SUMMARY

Computer Engineering student with a strong focus on Machine Learning, Data Science, and Artificial Intelligence. Experienced in Python-based data analysis, SQL querying, and building machine learning pipelines. Passionate about applying data-driven solutions and computer vision techniques to real-world problems.

EDUCATION

ADA University – BSc in Computer Engineering (GPA 3.18/4.00)

Baku, Azerbaijan | Expected Graduation: 2027

Relevant coursework

Data Structures & Algorithms, Database Systems, Machine Learning, Artificial Intelligence, Probability & Statistics, Linear Algebra

Chung-ang University – Academic Exchange

Seoul, South Korea | September 2025 – December 2025

Relevant coursework

Database Systems(SQL) , Discrete Mathematics, Computer Architecture

EXPERIENCE

Data Science and Analytics Intern – Azeri M-I

Baku, Azerbaijan | Head Office | April 2026 – Present | Part – Time

- Supporting development of a computer vision-based system to track movement of field equipment using camera data
- Assisting in data collection, annotation, and preprocessing of visual datasets
- Contributing to reporting and interpretation of results for ongoing tasks

AI Researcher – Independent Academic Research

Chung-Ang University | AI Laboratory | Seoul, South Korea
October 2025- December 2025 | Part - Time

- Collaborated with an academic AI laboratory on applied machine learning and computer vision experiments using GPU-accelerated workflows.
- Built and maintained data preprocessing and augmentation pipelines, supporting large-scale experimental analysis.
- Designed and executed end-to-end machine learning pipelines, from data preparation to model evaluation, using Python and PyTorch.

Selected Projects:

- **Fake News Detection (NLP – BiLSTM):** Developed a GPU- accelerated BiLSTM-based fake news detection system using PyTorch: Github Link
- **Real-Time Deepfake Detection (CNNs):** Conducting a comparative study of lightweight CNN architectures for real-time deepfake detection: Github Link
- **AgroVision AI:** Co-developed an AI-powered web application for agricultural insights. Responsible for AI/ML components, including model integration and inference logic, while collaborating with a teammate on the web interface and deployment: Demo Website and Github Link

Azorel LMP — Data Analyst – Internship

Baku, Azerbaijan | Head Office | June 2024 – August 2024 | Full - Time

- Assisted with collecting, organizing, and validating vendor data for procurement analysis.
- Helped maintain a structured vendor database, ensuring data accuracy and consistency.
- Prepared weekly summaries on pricing, supplier reliability, and delivery timelines using Excel-based analysis.
- Supported documentation, sourcing tasks, and vendor communication workflows.

Skills

Technical Skills

- Data Analysis & Reporting: SQL, Excel (Pivot Tables, Data Validation), Python (Pandas, NumPy), EDA, Data Cleaning
- Programming: Python, SQL, Java, C/C++
- Machine Learning: Scikit-learn, Feature Engineering, Model Evaluation
- Tools: Git, GitHub, Jupyter Notebook, VS Code

Soft Skills

Analytical Thinking • Problem Solving • Research Skills • Team Collaboration • Adaptability • Attention to Detail

Achievements & Certificates

- **ADA University:** List of Distinction (GPA 3.2), Fall 2024
- **ADA University**: Dean's List of Distinction (GPA 3.56), Spring 2025
- **Sigma Software University & IDDA– StrategEast**: Digital Level Up Program – Data Science
- **Coursera:** IBM Data Science, AI For Everyone, Google Data Analytics
- **Oracle:** OCI AI Foundations Associate 2025
- **Udemy:** 100 Days of Code: Python Pro Bootcamp, Python for Machine Learning & Data Science Masterclass
- **Certificates of Participation**: Abyss Hackathon, IDDA Hackathon

Languages

Azerbaijani (native), **English** (fluent)
